ABOUT

As a metaphor of eternity, marble stands for strength and solidity with no equals among other materials. Oki Table brings the beauty created by elemental forces into the home. Large slabs of natural stone seem to float over the delicate framework. The organic markings crisscross the table top like sinuous, imposing branches. Almost an abstract painting of white strands, a still sculpture – discreet, elegant and powerful at the same time. Every table is unique, an exclusive centerpiece just about to show off its value in daily use. Design: EOOS.
